

Tsuta
Japanese Soba Noodles 蕎麦

*"Yes, we are the world's first
Michelin Star ramen.
But we are not stopping there"*

Driven by his ambitious desire to create truly original flavours,
Chef Yuki Onishi sought to redefine the classic Ramen
experience; without any artificial components or MSG. Taking
inspiration from premium, natural ingredients, he created
the World's First Michelin-starred Ramen eatery, Tsuta.

A great deal of effort goes into engineering a bowl of Tsuta ramen. A combination of Chef Yuki Onishi's unique Dashi ("Soup Broth"), oils and sauces come together to create a delicate, multi-layered umami flavour burst.

Chef Yuki Onishi never believes in shortcuts. With meticulous culinary techniques and premium sourced ingredients, he creates savoury, inventive flavours that need no MSG or artificial flavouring. The taste and texture of each dish are constantly fine-tuned and revised by the chef himself.

*There is no perfect bowl of ramen.
only a delicacy that's constantly
more delicious than before.*

TSUTA ORIGINALS

Chef Yuki Onishi has always been bent on creating original flavour profiles. Everything completely conceptualised by Chef Yuki Onishi with a strict adherence to natural ingredients. Months of research and experimentation come before each master creation is conceived. Every bowl is the heart and soul of Chef Yuki Onishi's vision.

Watch Chef Yuki share
The Story of Tsuta

Ingredients come first

With premium ingredients come exceptional flavour. Ever the idealist, Chef Yuki Onishi rejects the idea of additives or artificial flavouring to drive a strong umami taste.

Three broths into one

Tsuta's signature dashi is the heart of every bowl of Tsuta soba. Three separate broths of chicken, clam and Japanese fish are simmered under strict temperature control.

Tsuta's Signature Shoyu Soba is a distinctively original dish. Featuring the restaurant's signature dashi, it gives a very full-bodied yet delicate taste.

Freshly made

Freshly made from his stone-milled whole wheat recipe on-site, Chef Yuki Onishi blends four types of specially selected wheat.

Golden Goodness

Nothing completes a bowl of ramen quite like an ajitama ("egg"). Our eggs are locally sourced to ensure ultimate freshness.

It's Different

We accompany our ramen, with Hosaki menma. Unlike regular bamboo shoots, the hosaki menma is harvested from a specific part of the bamboo head which boasts of a softer texture

One of a kind

Tsuta's signature Shoyu base is a one of a kind special blend, using custom-brewed Shoyu from Wakayama Prefecture, made to Chef Yuki Onishi's specifications
